## DETAILED ACTION

### *Allowable Subject Matter*

The argument in the response to the non-final rejection is persuasive and the non-final rejection of previous office action is withdrawn. Claims 13, 15-18, 20, 29, 31-32, and 34 are allowed. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest either in singularly or in combination the following limitations and other elements in the claims:

References Jackson et al. (US 6,627,822), Kalidas et al. (US 6,396,136), Byun et al. (US 6,736,306), and Barber et al. (US 6,600,220) do not disclose:

- Forming the series of secondary electrical contacts as a plurality of secondary solder balls, each secondary solder ball of the series defining a second diameter, the second diameter defined by each of the secondary solder balls being greater than the first diameter defined by each of the primary solder balls.
- Coupling the series of secondary electrical contacts comprises coupling the series of secondary electrical contacts to the coupling surface of the substrate, the coupling surface configured to oppose a mounting surface of the circuit board, the substrate having at least one power plane, at least one ground plane, at least one plated through hole in communication with the at least one power plane, and at least one plated through hole in communication with the ground plane.

- Forming the substrate having a length that is greater than 45 mm and having a width that is greater than 45 mm.
- Coupling the grid array of primary electrical contacts to the coupling surface of the substrate comprises coupling the grid array of primary electrical contacts to the coupling surface of the substrate in an array pattern of 50 columns having 50 primary electrical contacts per column within the central portion defined by the substrate, the grid array of primary electrical contacts configured to carry data signals between the area array package and a circuit board.

Therefore, the above references do not disclose the claimed invention of present application and claims 13, 15-18, 20, 29, 31-32, and 34 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wai-Sing Louie whose telephone number is 571-272-1709. The examiner can normally be reached on 7:30 to 5:00.
